## Projects

---

**NomadNest — HTML, CSS, JavaScript, Node.js, Express.js, MongoDB, EJS**

[NomadNest](#) 

- Developed a fully functional travel booking platform designed to connect travelers with unique stays across the globe. The project aims to provide an intuitive, user-friendly experience for both hosts and guests, allowing them to list, discover, and book accommodations with ease.
- Authentication & Authorization: Secure signup/login using Passport.js
- Security Enhancements: Encrypted password storage and role-based access control.
- Location Services: Mapbox – Interactive maps for easy navigation.

**CarCare Spa — HTML, CSS, Javascript, TailwindCSS**

[CarCare Spa](#) 

- This is a responsive Car Washing Station Website built using HTML, CSS, and JavaScript, designed to showcase premium car cleaning and detailing services. The website offers an engaging and user-friendly interface for potential customers to explore available services and book appointments.

**SimonGame — HTML, CSS, JavaScript**

[GitHub](#) 

- The Simon Game is a classic memory and pattern recognition game where players must replicate an increasingly complex sequence of colors and sounds. Created using JavaScript, HTML, and CSS, this version features a modern interface and interactive gameplay. The game includes dynamic animations, audio cues, and progressively challenging sequences to test players' memory and reflexes. It's a great project for showcasing frontend development skills and JavaScript logic.

## ExtraCurricular

---

**Microsoft Student Chapter (College Society)**

*November 2024 - Present*

**Web Developer**

- Web Developer in the Microsoft Student Chapter at MSIT, actively participating in hackathons, workshops, and events.
- Contributed to the development of the society, enhancing its technical initiatives and community engagement
